12. Summary of the bank's internal approach to assess the adequacy of its capital to support current & future activities

- Preparation of annual budget for risk weighted assets vis-à-vis capital fund
- Monitoring of risk weighted assets and capital fund at the periodic interval
- Preparing prospective drawdown and repayment plan of loans and advances
- Revision of asset deployment strategy as per the requirement
- Reporting of capital adequacy ratios on a periodic basis to Nepal Rastra Bank (NRB)

The bank prepares annual budget plan for risk weighted assets and monitor the actual against the budget in detail with a close watch on prospective drawdown and repayment plans to track the movement in loan portfolio. Moreover, changes in business environment are monitored for strategy planning and revision in order to mitigate anticipated adverse impact on its risk assets portfolio. Capital adequacy ratios are computed on a periodic basis to ascertain the qualifying capital fund is adequate for coverage of the bank's risk assets.

Furthermore, long term capital plans are also prepared to support the bank's future activities. The capital plan is reviewed to ensure that the financial result attained is in line with the capital plan devised. Based on the actual figures, if the bank feels that the figures could deviate significantly, the bank revises its long term plan.

The bank continuously monitors its Credit Deposit ratio in order to assess sources of funds and deployment of funds.
